

An Engineers Guide to the Spirit World: My Journey from Skeptic to Psychic Medium

Nobody knows how the universe works, but that's what intrigues John Roncz. He's a medium. But he's also an aeronautical engineer. While communicating with someone who no longer has a physical body, he's analyzing how he's getting the information. With every reading, he learns more about the spirit world. In this book, he shares what he learned.

"I was a scientific observer at a workshop called "Where Science Meets Spirit" and witnessed John Roncz's ability to access very rich and precise details—names, past events, emotions—from a late individual he didn't know. These facts were recognized as true by his family and friends. Clearly he could not have acquired this information by any known biological channel. These hard facts cannot be explained by current models of reality, driving us to think about the concept of "spirit" as a model we should explore, especially since quantum physics opens such strange perspectives on the nature of our universe. Therefore John's work contributes nicely to a new understanding of the nature of reality, life ... and beyond."—Alain Rifat, Ph.D., Collège Sismondi, Geneva, Switzerland

"I first knew John Roncz in the late 1970s. Since then I have followed his work on a great many aeronautical projects. His thoroughness, imaginative insight, investigative patience, and minute attention to detail are remarkable. Time and again—for instance, on the globe-girdling Voyager and Global Flyer projects—managers have told me that without John's contributions success would likely have eluded them. Polymath and autodidact, John is both a remarkable person and a very accomplished scientist and engineer."—Peter Garrison, author of the "Technicalities" column for *Flying* magazine
